## **VISION**

Quality, life-long education for all which is accessible, inclusive and relevant to individual, national and global needs and value systems.

## **PREFACE**

The syllabus was produced as a result of the Curriculum review process carried out by the Ministry of Education, Science, Vocational Training and Early Education under the auspices of the Curriculum Development Centre (CDC). The curriculum reform process started way back in 1999 when the Ministry of Education commissioned five(5) curriculum studies which were conducted by the University of Zambia. These studies were followed by a review of the lower and middle basic and primary teacher education curriculum. In 2005 the upper basic education National survey was conducted and information from learners, parents, teachers, school managers, educational administrators, tertiary institutions traditional leaders civic leaders and various stakeholders in education was collected to help design a relevant curriculum ,.

The recommendations provided by various stakeholders during the Upper Basic Education National survey of 2005 and National symposium on curriculum held in June 2009 guided the review process.

The review was necessitated by the need to provide an education system that would not only incorporate latest social, economic, technological and political developments but also equip learners with vital knowledge, skills and values that are necessary to contribute to the attainment of Vision 2030.

The syllabus has been reviewed in line with the Outcome Based Education principles which seek to link education to real life experiences that give learners skills to access, criticize analyze and practically apply knowledge that help them gain life skills. Its competences and general outcomes are the expected outcomes to be attained by the learners through the acquisition of knowledge, skills, techniques and values which are very important for the total development of the individual and the nation as a whole.

Effective implementation of Outcome Based Education requires that the following principles be observed: clarity of focus, Reflective designing, setting high expectations for all learners and appropriate opportunities.

It is my sincere hope that this Outcome Based syllabus will greatly improve the quality of education provided at senior secondary school as defined and recommended in various policy documents including Educating Our Future`1996 and the `Zambia Education Curriculum Framework `2013.

## **Acknowledgements**

The syllabus presented here is a result of broad-based consultation involving several stakeholders within and outside the education system.

Many individuals, institutions and organizations were consulted to gather their views on the existing syllabus and to accord them an opportunity to make suggestions for the new syllabus. The Ministry of Education wishes to express heartfelt gratitude to all those who participated for their valuable contributions, which resulted in the development of this syllabus.

The Curriculum Development Centre worked closely with other sister departments and institutions to create this document. We sincerely thank the Directorate of Teacher Education and Specialized Services, the Directorate of Planning and Information, the Directorate of Human Resource and Administration, the Directorate of Open and Distance Education, the Examinations Council of Zambia, the University of Zambia, schools and other institutions too numerous to mention, for their steadfast support.

We pay special tribute to co-operating partners especially JICA and UNICEF for rendering financial technical support in the production of the syllabus.

## **INTRODUCTION**

The Zambia Senior Secondary School syllabi (Grades 10 to 12) are a result of extensive consultation undertaken to reform the existing one.

The new curriculum is outcomes based and focuses on results rather than on goals, aims and objectives. It places emphasis on observable and measurable knowledge, skills and values to be acquired by learners at specific levels of their schooling. The new curriculum emphasises learner centredness and provides for increased learner-teacher contact time.

Continuous assessment is another prominent feature of the new curriculum. This allows for regular monitoring of individual learning process, diagnosis of learning difficulties and provision of remedial teaching.

In addition, the curriculum integrates cross-cutting issues and themes such as HIV and AIDS, Life Skills, Gender, Human Rights, Reproductive Health, Good Governance, Environmental Education and Water and Sanitation across the curriculum to ensure holistic development of the learner. Throughout the learning process, the curriculum will lead to the development of entrepreneurship skills.

In view of the magnitude of what is to be accomplished, there will be need for firm commitment by learners, teachers, educational administrators, parents and other stakeholders to the achievement of the changes designed to make the education system responsive to individual, community and national needs.

## **SUGGESTED METHODOLOGIES**

These shall include, but not limited to:

- Desk and field research;
- Role play/drama;
- Debate;
- Teacher exposition;
- Group discussions;
- Education tours to relevant historical sites;
- Learning and teaching aids;
- Questions and answers.

## **TIME ALLOCATION**

High School History will be offered over a period of three (3) years, i.e., from Grade 10 to 12. Each class taking History will have four (4) periods of allocated per week, each period lasting forty (40) minutes. All the four periods will be single.

## **ASSESSMENT**

In order to ensure that learning is taking place there will be need to have the learners assessed regularly. This assessment will take the form of continuous assessment to be done at specified periods determined by school administrators, termly tests as well as the final examination which will be set by the Examination Council of Zambia at the end of Grade 12.

## **RATONALE**

The History syllabus has been prepared and produced against the background and needs of the Education Sector, Millennium Development Goals and Vision 2030 which emphasise on Zambia being a middle income country. It is also in line with the structure of the Reviewed Curriculum Framework. It underscores the importance of understanding the historical development of man from antiquity to the present time. Once this understanding is developed, the learner would be able to appreciate the present events and have an informed direction of where society is likely to be in future.

To this effect the History syllabus aims at:

- Applying historical knowledge, skills and values to the understanding of historical events;
- Enabling learners evaluate sources of historical information to determine their authenticity;
- Empowering learners with skills to write reasoned essays on some historical topics;
- Assisting learners in evaluating current social, political, economic and cultural challenges with a view to offering possible solutions.
